

For replacements or a whole new structure, we have what you need.

The complete line of VAL-CO® products provides consistent performance, easy service, innovative solutions, cost-effective results...

- Feed Bins, Fill Systems
- Feeders
- Watering Systems
- Ventilation Fans, Inlets, Controls
- Heaters
- Evaporative Cooling
- Cremators

... and much more.

- Automatic Systems
- Outstanding Value
- Excellent Customer Service
- Technical Research
- Information Resources
- Engineering Ability

More Solutions Under One Roof

Complete Line of Top Performing Products

VAL-CO® is a full-line manufacturer of high-quality systems and components for commercial pig production – serving pork producers since 1947. To guarantee performance you can count on, all VAL-CO products are expertly designed and manufactured with the end-user in mind. Our *worldwide presence* and commitment to providing leading products and technical service make VAL-CO your indispensable business partner.

As We Learn, We Share

VAL-CO engineers and field people have teamed up with all aspects of the hog industry to find better solutions. We continue looking for new ways of producing healthier animals with better feed conversion.

Our results are improving your environmental controls, ventilation, cooling and heating, feeding, and watering systems. Besides developing innovative new products, we are committed to sharing technical information with you through training and printed materials. That's the way we work, that's the way we learn.

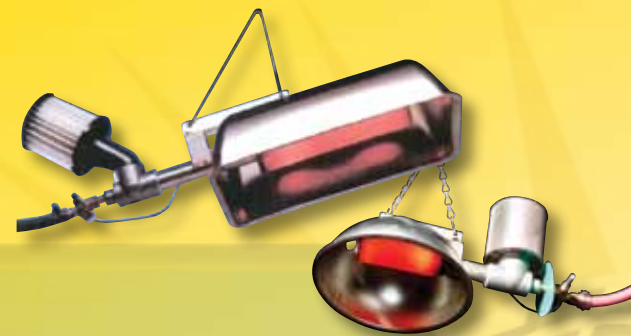

Research, training and problem solving.

One Source. Many Solutions.

Cremators that save up to 65% fuel consumption

Accurate & reliable heaters with low profile design for less space

Feed delivery options for all phases of growth

Hog drinking cups that reduce spillage by as much as 40%

Effective evaporative cooling using pad or ultra-high pressure pad-free systems

A full line of controls to help automate practically every aspect of your operation

Feed bins and fill systems that provide the most efficient delivery

High performance ventilation fans, inlets and vent door actuators for the ideal environment

Because we control the manufacturing, we can assure premier quality and product compatibility.
