

Wet/Dry Feeders – Less Waste, More Gain.

Wean-To-Finish
Double Feeder – RD-NDWF50

Wean-To-Finish Feeder – RD-NWF24

Optional starter water line allows you to place water in the pan for small weaner pigs.

Stainless Steel Wet/Dry Feeders

Now you can mix the feed and water for optimum feed intake for growth efficiency.

Design & Construction:

- 304 grade SS and high quality plastic construction
- Single water line hookup
- Raised center feeding platform and weep hole design prevent water overflow and wicking around the feed tube
- Hopper with hinged lid for manual filling
- Optimal feed efficiency
- 25 adjustable settings for precise feed control
- Easy cleaning
- Rugged UV stabilized hoppers with 110lb capacity (optional on RD-NWF24)

Wean/Finish Feeders: Double (RD-NDWF50) & Single (RD-NWF24)

- Proven pan design provides efficient feed and water consumption from wean to finish
- Three nipples - two feed platforms allows more pigs to eat at one time
- 2 UV stabilized hoppers
- Excellent for large sorter barns
- 35 - 40 pigs per side for double feeder
- 25 - 30 pigs per side for single feeder

Stainless Steel Wet/Dry Feeding Systems: Finisher Feeder (RD-NSF27) & Nursery Feeder (RD-NSN23)

Finisher Feeder – RD-NSF27

- Large pan design allows more pigs to eat at one time
- Pan design and nipple placement allows easy access for small pigs
- Precise adjustment
- 25 - 30 pigs per side for Finish Feeder
- Up to 30 pigs per side for Nursery Feeder

Nursery Feeder – RD-NSN23
