Equipment Support Solutions

Structural Towers, Structural and Bolt Together Catwalks

Elevator support tower designed complete with integral spiral stairway and platforms.

Equipment Support tower constructed with structural steel columns, beams and braces.

Custom catwalks and towers with top and intermediate platforms.

Catwalks may be designed to support conveyors of any width. Walkways may be supplied with structural bar grating or cold formed slip resistant decking.

245’ (74.68 m) long catwalks with 130’ (39.62 m) clear span and 6’ wide (1.83 m) wide Under-Truss with 10’ (3.05 m) wide deck support designed for high capacity grain handling.

20’ x 20’ x 136’ (6.10 m x 6.10 m x 41.45 m) Structural tower with self supporting switch-back stairway.

Custom catwalks and equipment support structures have the flexibility to meet all design requirements.

Our custom designs allow catwalks and equipment to connect at angles and inclines to suit requirement of the site.

Cold Formed Catwalk Systems

Bolt-together all-galvanized steel catwalks are available in standard widths of 48”, 58” and 68” (1.22 m, 1.47 m and 1.72 m) with clear spans up to 50’ (15.25 m). Each catwalk includes a 24” (610 mm) wide non-skid walkway. Full-width walkway versions are available for personnel movement. All catwalks are manufactured from high-strength galvanized steel with G115 coating (minimum 350 grams/m^2 zinc) and are available in increments of 4’0” (1.22 m) in lengths starting at 12’0” (3.66 m).

Structural Catwalks and Towers

SCAFCO structural steel catwalks and towers are custom-designed to meet project requirements. All custom SCAFCO structures bolt together on site and can be designed to meet varying live, wind and seismic requirements. Structures allow the flexibility to add platforms, walk-around access as needed, where necessary. All structural catwalks and towers are fabricated by certified welders and are hot-dip galvanized to ensure many years of maintenance free reliability.
