

The M3 Infrared Heater
with Standard Filter

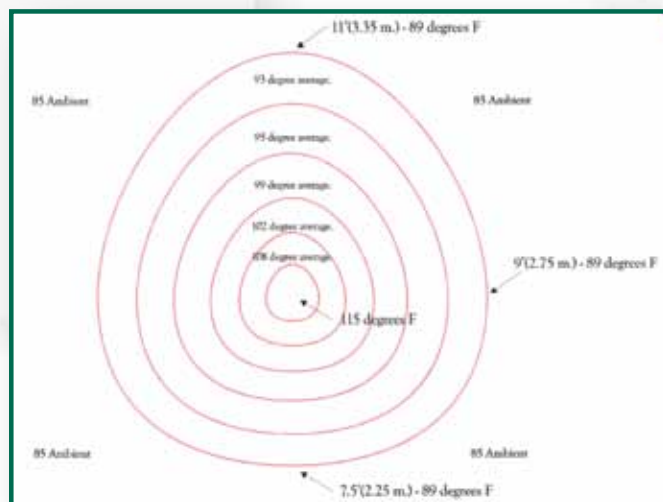

Turn Up The Heat & Turn Down Your Costs.

Infrared heating from VAL-CO® has its advantages. Unlike other forms of heating that use significant amounts of energy to heat an entire building, infrared heat allows you to concentrate the heat directly to the animals and the floor. This will provide you with lower fuel costs and provide your animals with their own comfort zone created by the patterns of heat projected from the infrared heater.

The M3 & M2 are constructed of stainless steel and can withstand high pressure washouts and reasonable abuse. With no moving parts, the simple, straight-forward design of Gasolec's M3 & M2 Infrared Heaters lead to low maintenance and easy service. Likewise, both of these heaters are available in propane and natural gas versions. The advantages of the M3 & M2 clearly make it a preferred choice in the animal confinement industry.

Highlights of the M3 & M2:

- Stainless Steel Construction
- Lightweight
- Low Maintenance
- Wide Operating Range
- Fuel Savings
- Reliability
