

*The M8 Infrared Heater
with Standard Filter*

Increase the Temperature Without Increasing Your Costs.

Infrared heating from VAL-CO® has its advantages. Unlike other forms of heating that use significant amounts of energy to heat an entire building, infrared heat allows you to concentrate the heat directly to the animals and the floor. This will provide you with lower fuel costs and provide your animals with their own comfort zone created by the patterns of heat projected from the infrared heater.

The M8 & M5 are constructed of stainless steel and can withstand high pressure washouts and reasonable abuse. With no moving parts, the simple, straight-forward design of Gasolec's M8 & M5 Infrared Heaters lead to low maintenance and easy service. Likewise, both of these heaters are available in propane and natural gas versions. The advantages of the M8 & M5 clearly make it a preferred choice in the animal confinement industry.

Highlights of the M8 & M5:

- Stainless Steel Construction
- Low Maintenance
- Fuel Savings
- Lightweight
- Wide Operating Range
- Various Filter Options Available

*The M8 Infrared Heater
with Heavy Duty Filter*

Performance You Can Count On

The VAL-CO® Family

- Watering Systems
- Feed Bins, Fill Systems
 - Feeders
- Ventilation Fans
 - Inlets
 - Heaters
