

The Best Start II Chick Feeder, with the optional extension sleeve, in the folded up position.

The Best Start II has a wide opening, providing chicks with the proper amount of food during their early growth stages.

The Best Way to Start Them Off!

Introducing the Best Start II Chick Feeder from VAL-CO®

The Best Start II chick feeder is now available through VAL-CO! This chick brooding starter feeder is comprised of the basic feeder, an optional extension sleeve or an optional crown sleeve. The feeder, extension sleeve and crown sleeve feature rugged, non-corrosive polymer construction. The fold away shut off design minimizes the chance of breakage by catch crews and winching systems. The feeder comes preassembled for installer convenience and fits virtually any style of feeder tube.

The Best Start II crown sleeve allows consistent small amount of feed to be fed to your chicks, even as feed lines are raised.
