Feed Milling Plants & Complete Ventilation Programme

SKIOLD Feed Milling plant

SKIOLD brings long experience to all solutions. The plant is designed and constructed specifically to meet your detailed demands. The SKIOLD modular concept and simplicity of the construction makes the implementation of your feed plant easy and fast. SKIOLD can provide basic feed mill plants or fully automated plants, which are computer controlled with full monitoring and tracking of production, and management information. The design of a SKIOLD feed mill is prepared for an easy and smooth extension in case your requirements changes over time.

The best possible production equipment provides for the very best feed quality. A SKIOLD feed mill always provides for the future!

SKIOLD climate control

SKIOLD has 30 years of experience with ventilation of pig sheds. SKIOLD tailors up-to-date solutions based on thoroughly tested components, which each complies with the great demands made by modern pig breeders all over the world.

Negative pressure, Equal pressure, Natural ventilation, heating and all control and communications, sprinkling, soaking as well as alarm unit and emergency ventilation

A wide range of components for air intake, control and exhaustion enable SKIOLD to design an energy-efficient ventilation plant, which complies with practically all demands.

SKIOLD Feeding Complete Programme within Dry & Liquid Feeding

SKIOLD Dry Feeding

SKIOLD holds a wide range within dry feeding equipment, as well as the largest know how within feeding systems. Therefore, we are able to comply with each request or requirement. The feeding systems are primarily used in pig housings but can also be used for transport of meal in connection with milling systems. SKIOLD has always focused on reliability and easy management of the products. A request from all pig producers for an efficient and optimum production has been one of our fundamental goal in connection with new development of machinery and systems. In short time today's demand for supervision and data communication, instantaneous information concerning operation economy as well as historical information concerning pig/pen/section will be taken for granted. It is SKIOLD intention to be in front with a product development, that reaches more than 10 years ahead

SKIOLD Liquid Feeding

SKIOLD liquid feeding system is constructed to meet the professional pig producers demands with regard to operational reliability, user friendliness and flexibility. The system is based upon an industrial computer, which with a Windows user interface shows the entire housing system on the screen. A special software shows housing incidents on the screen as they occur in the housing. This means that newly employees with no knowledge of liquid feeding immediately feel comfortable with operating the system. The flexibility makes the system suitable for small as well as large housings.

SKIOLD

Your Complete Supplier

SKIOLD A/S is among the largest European manufacturers of equipment for mechanisation of modern farming, and has long experience with production and advisory services regarding feeding systems, ventilation, and plants for feed production. The target group is animal producers.

Many years as supplier for Danish as well as foreign customers have provided SKIOLD with a wide experience in satisfying the different requirements from animal producers worldwide, on the basis of different statutory requirements regarding animal welfare, etc.

At SKIOLD the customer is at the centre, and the product development takes place with focus on in-puts from the most foresighted producers in Denmark as well as on the export markets. The export sales constitute 35% of SKIOLD's total turnover.

The SKIOLD group consists of various companies, which are all suppliers to the primary farming, or related businesses, which strengthen their position through a close cooperation the individual companies in between; by way of example development tasks are often solved across the group.
